**PASSENGER  
BOARDING  
BRIDGES**

**Anton Air Support is the global partner for new and refurbished passenger boarding bridges. We deliver tailor-made solutions.**

## EXPERIENCED SPECIALIST FOR NEW AND REFURBISHED PASSENGER BOARDING BRIDGES

Anton Air Support is an experienced supplier of refurbished passenger boarding bridges. When maintenance is carried out regularly and in a maintenance cycle, we can extend the life span of the PBB by more than 10 years.

The Anton Air Bridge is a new type of passenger boarding bridge that can be tailor-made for the client. The body frame of the ABB will be further finalized with durable materials, up-to-date software, innovations, and more. The Anton Air Bridge can consist of a two- or three-part tunnel, made of steel or glass, and can be painted in any color the customer desires. Also included, is the rotunda, with the engineered column and service stair.

### Options:

- Type Apron or Nose-loader PBB
- Hydraulic or an electrical bridge
- Pre Conditioned Air (PCA) mounted under the bridge
- Ground Power Unit (GPU) mounted under the bridge
- Service stair, according to the EN 12312
- Belt loader attached to the service stair
- Vertical curtain, closed or transparent
- Cabin door: swing door or roller door
- Airconditioning in the tunnel
- Automated docking incorporated into the software

We use our 2024 Edition Operating System for easy, smooth, and safe operating of the PBB. Simple layout for trained operators. We can instal a hydraulic or an electric operated bridge.

# NEED SERVICE SUPPORT FOR YOUR AIRPORT?

Anton Air Support is the specialist in supplying, inspecting, renovating, installing and maintaining Passenger Boarding Bridges (PBBs) at airports around the world, but mainly in Europe. Our mission is to extend the life span of the PBB at any airport and contribute to preserving a livable planet for future generations.

**“Building your ambitions starts with contacting Anton Air Support.”**

Our Technical Specialists inspect PBBs all around the world and provide professional independent advice on the current condition and expected life span of the PBB.

Regular maintenance must be executed. We perform specialized maintenance independently or in collaboration with your technical team.

We can extend the operational life span of the PBB with more than 10 years. From a simple basic upgrade until a full refurbishment.

Our technical skilled professionals can instruct your operators on site to operate the PBB easy, smooth and safe. We can cooperate with your maintenance team, so they can learn on the job.

We are professionals in dismantling, transporting and installing different types of PBBs, according to the current safety airport requirements.

We execute the FAT (Factory Acceptance Test) and SAT (Site Acceptance Test) for all kind of PBBs.

**INDEPENDENT ADVICE  
AND 24/7/365  
SERVICE**

**QUALIFIED & EXPERIENCED  
SKILLED TECHNICIANS**

**SUSTAINABILITY AND  
EXTENDING LIFE SPAN**

### TAILOR-MADE

Our engineers can design and manufacture a PBB to your specific internal and external requirements.

### ISO 14001 CERTIFIED

Anton Air Support meets all requirements for environmental quality management regarding installing, maintenance and refurbishment of the PBBs.

### PARTNERSHIP

Our specialized technical team can be complementary to your technical team to inspect and maintain the PBBs to extend the life span. A loyal and reliable partner for a long partnership.

### QUALITY

Anton Air Support is a synonym for high quality, flexibility, professional, expert, specialist, innovation and more. A loyal and reliable partner for decades.

### CO2 FOOTPRINT

We reuse existing materials of the PBB and use new sustainable materials to ensure the CO2 emissions are minimized. This method is also cost saving.

### COST REDUCTION

Reducing costs with 38% or more is achievable if regular maintenance is performed in the right way and cycle. Replacement with sustainable materials will save costs in the future.

**Anton Air Support** is part of the **Anton Groep**. The Anton Groep is an open, down-to-earth and loyal company that is building the future of Europe with 15 operating companies. They all offer innovative solutions for steel and concrete construction, industry, ground, road and hydraulic engineering and on and around the railways and airports.

We realize large leading European projects as well as smaller regional projects. With over 200 professionals, a large regular customer base and many years of experience, the Anton Groep has become a well-known name in the market.

Our starting point is to offer the highest quality, consistently and at every level. A promise that we can fulfill through entrepreneurship, flexibility, innovative strength and working with real professionals. We offer craftsmanship, in which quality, sustainability, safety and attention to the environment and the living environment are paramount. The certifications we have obtained in the past years are proof that we meet these requirements.

The 4 core values of the Anton Group arise from our identity and indicate what we consider important and valuable as a company. Our core values run through all our processes and briefly describe our way of working and the way we do business. This is what we stand for:

- A deal is a deal
- Take responsibility
- Show respect
- Growth through collaboration
