Building your ambitions

PBB before refurbishment

For sale:
Passenger Boarding Bridge

€ 300.000

INTRODUCING OUR PASSENGER BOARDING BRIDGE

Our A3-60/119 (18,3/36,3 meter) bridge is built with 3 steel tunnel bridge to ensure maximum safety and comfort for passengers.

We understand the importance of smooth operations, which is why our bridge has undergone full mechanical and electrical refurbishment to ensure top-notch performance. It's equipped with the latest operating system (version 2023, including Rotunda and column) which makes it highly efficient and user friendly. All of these features come at a price of € 300.000,- excluding VAT, EX Works (Obdam Netherlands) excluding dismantling and installation costs.

However, we also provide various options that we can arrange for you, such as dismantling the bridges for transport, transportation to a new destination, installation on site, and SAT and commissioning on site.

Thanks to our many years of work experience and the specialist knowledge we've accumulated in various types of PBB, we can extend the lifespan of old existing PBB by years. For Anton Air Support, "life cycles" are a crucial factor to keeping our planet alive.

Soon available. Call +31 (0)6 39 13 01 90 for more information!
